

## Large magnetic reed KY-025 FOR

Use the magnetic module and the digital interface with 13 LED to build a simple circuit, making magnetic field indicating lights.

Use the LED built in the digital interface 13 to connect the magnetic sensor to digital interface 3. When the magnetic sensor senses a button signal, the LED is on; otherwise, it will be off

Sample Code:

```
Int Led=13; // define LED interface  
Int buttonpin=3; // define magnetic sensor interface  
Int Val; // define digital variable val  
Void Setup ( )
```
